ABNORMALITIES, DEVELOPMENTAL
A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225
ABSCESS, DENTAL/etiology
Gingival/soft tissue abscess following subepithelial connective tissue graft to root coverage: report of three cases/ Vastardis S, et al. 1676
ACID ETCHING, DENTAL
Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite- coated implants in the canine model. Conner KA, et al. 658
Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575
ACID PHOSPHATASE
Clinical and histologic aspects of dental implants removed due to mobility. Piattelli A, et al. 385
ACQUIRED IMMUNE DEFICIENCY SYNDROME/ complications
Oral Kaposi sarcoma associated with severe alveolar bone loss: case report and review of the literature. Lausten LL, et al. 1668
ACTINOBACILLUS ACTINOMYCETEMCOMITANS
Association of periodontal status with general health conditions and serum antibody titers for *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. Furuichi Y, et al. 1491
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*. Tong KSK, et al. 1582
Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460
ACUTE PHASE REACTIONS
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007
ADENOSINE TRIPHOSPHATE
Effects of chlorhexidine, minocycline, and metronidazole on *Porphyromonas gingivalis* Strain 381 in biofilms. Noiri Y, et al. 1647
ADIPONECTIN
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
ADJUNCTIVE THERAPY
Effects of selective cyclooxygenase-2 inhibition on gingival tissue levels of prostaglandin E_2 and prostaglandin $F_{2\alpha}$ and clinical parameters of chronic periodontitis. Vardar S, et al. 57
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420
ADOLESCENTS
Periodontal diseases of children and adolescents. Position paper. 1696
Reliability of clinical attachment level recordings: effects on prevalence, extent, and severity estimates. López R, et al. 512
AGE FACTORS
Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610
ALCOHOLISM
The influence of gingival margin recession on loss of clinical attachment in alcohol-dependent patients without medical disorders. Khocht A, et al. 485
ALENDRONATE/therapeutic use
Combined local application of tetracycline and bisphosphonate reduces alveolar cone resorption in rats. Yaffe A, et al. 1038
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiodsteal flap surgery in the rat mandible. Kaynak D, et al. 1348
The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44
ALKALINE PHOSPHATASE
Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780
ALLELES
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
ALPHA-1-ANTITRYPSINS
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
ALPHA MACROGLOBULINS
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
ALVEOLAR BONE
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
Minocycline-induced staining of torus palatinus and alveolar bone. Ayangco L, et al. 669

Index

Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957

ALVEOLAR BONE/anatomy and histology

Alveolar bone response in an experimental model of renal failure and periodontal disease: a histomorphometric and histochemical study. Mandalunis PM, et al. 1803

ALVEOLAR BONE LOSS

Association between alveolar bone loss and elevated serum C-reactive protein in Japanese men. Saito T, et al. 1741

Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547

ALVEOLAR BONE LOSS/pathogenesis

Oral Kaposi sarcoma associated with severe alveolar bone loss: case report and review of the literature. Lausten LL, et al. 1668

ALVEOLAR BONE LOSS/prevention and control

Combined local application of tetracycline and bisphosphonate reduces alveolar cone resorption in rats. Yaffe A, et al. 1038

A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348

Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060

ALVEOLAR BONE LOSS/therapy

Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al. 679

Gene therapy of bone morphogenetic protein for periodontal tissue engineering. Jin Q-M, et al. 202

ALVEOLAR RIDGE

Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990

ALVEOLAR RIDGE AUGMENTATION

Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965

Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648

Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al.

Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635

The segmental ridge-split procedure. Coatoam GW, et al. 757

Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255

ALVEOLAR RIDGE EXPANSION

The segmental ridge-split procedure. Coatoam GW, et al. 757

AMELOBLASTOMA

Ameloblastoma of the mandible: a case report. Levin MP, et al. 883

AMELOGENIN

Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423

AMERICAN ACADEMY OF PERIODONTOLOGY

The use of conscious sedation by periodontists. Policy statement. 934

AMERICAN ACADEMY OF PERIODONTOLOGY FOUNDATION

2003 Annual Report. 1858

ANDROGENS/metabolism

Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory, et al. 1771

ANESTHESIA, CONSCIOUS SEDATION

A preliminary study on oxygen saturation levels of patients during periodontal surgery with and without oral conscious sedation using diazepam. Aeschliman SD, et al. 1056

ANESTHETICS, LOCAL

Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597

ANGIOGENESIS

Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181

Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521

Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498

ANIMAL STUDIES

Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423

Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483

Index

Characterization of biologically active cell surface components of a periodontal pathogen. The roles of major and minor fimbriae of *Porphyromonas gingivalis*. Umemoto T, et al. 119

Combined local application of tetracycline and bisphosphonate reduces alveolar cone resorption in rats. Yaffe A, et al. 1038

A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454

Defect-determined regenerative options for treating periodontal intrabony defects in baboons. Blumenthal NM, et al. 10

The effect of enamel matrix proteins on periodontal regeneration as determined by histological analyses. Cochran DL, et al. 1043

Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomizd rats. Duarte PM, et al. 1618

Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787

Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136

Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865

Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023

Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808

Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658

Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242

A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348

In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641

Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976

The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366

Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603

Mandibular bone remodeling under a choline-deficient diet: a histomorphometric study in rats. Gorustovich AA, et al. 831

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521

Optimum force and duration of toothbrushing to enhance gingival fibroblast proliferation and procollagen Type I synthesis in dogs. Tomofuji T, et al. 630

Peri-implant soft tissue integration of immediately loaded implants in the posterior macaque mandible: a histomorphometric study. Siar CH, et al. 571

Periodontal regeneration with a combination of enamel matrix proteins and autogenous bone grafts. Cochran DL, et al. 1269

Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957

Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al. 1143

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153

Role of the microgap between implant and abutment: a retrospective histologic evaluation in monkeys. Piattelli A, et al. 346

Spatial extent of gingival cell activation due to mechanical stimulation by toothbrushing. Sakamoto T, et al. 585

Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338

ANTIBODIES
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007

ANTIBODIES, HUMAN MONOCLONAL
Human monoclonal antibody inhibits *Porphyromnas gingivalis* hemagglutinin activity. Kaizuka K, et al. 38

ANTIBODY RESPONSE
Antibody responses of periodontitis patients to gingipains of *Porphyromonas gingivalis*. Inagaki S, et al. 1432

ANTIBODY TITER
Association of periodontal status with general health conditions and serum antibody titers for *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. Furuichi Y, et al. 1491

ANTIGEN
Hereditary gingival fibromatosis and expression of Ki-67 antigen: a case report. Saygun I, et al. 873

ANTIGEN, ENCAPSULATED
Adhesion of *Porphyromonas gingivalis* serotypes to pocket epithelium. Dierickx K, et al. 644

ANTIGEN, PROLIFERATING CELL NUCLEAR
Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Çelenligil H, et al. 247

Index

Optimum force and duration of toothbrushing to enhance gingival fibroblast proliferation and procollagen Type I synthesis in dogs. Tomofuji T, et al. 630

ANTI-INFECTIVE AGENTS/therapeutic use
Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579

ANTIMICROBIAL AGENTS
Modulation of *Porphyromonas gingivalis* proteinase activity by suboptimal doses of antimicrobial agents. Grenier D, et al. 1316

APOPTOSIS
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176

APOPTOSIS MEDIATORS
Evaluation of p53, bcl-2, and interleukin-1 levels in gingival crevicular fluid of cyclosporin A-treated patients. Buduneli E, et al. 506

ASPARTATE TRANSAMINASE
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145

ATHEROSCLEROSIS
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007

ATHEROSCLEROTIC DISEASES/etiology
Interactions of *Porphyromonas gingivalis* with host cells: implications for cardiovascular diseases. Kuramitsu HK, et al. 85

AUTOANTIBODIES
Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879

AUTOIMMUNE DISEASES
Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879

B

BACTERIA/drug effects
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312

BACTERIAL ADHESION
Adhesion of *Porphyromonas gingivalis* serotypes to pocket epithelium. Dierickx K, et al. 644

BACTERIAL TRANSLOCATION
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312

BACTEROIDES FORSYTHUS
Detection of *Tannerella forsythensis (Bacteroides forsythus)* and *Porphyromonas gingivalis* by polymerase chain reaction in subjects with different periodontal status. Klein MI, et al. 798
Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460

BEVERAGES, CARBONATED
Permeability and morphology of dentin after erosion induced by acidic drinks. Prati C, et al. 428

BIOFILMS
Effects of chlorhexidine, minocycline, and metronidazole on *Porphyromonas gingivalis* Strain 381 in biofilms. Noiri Y, et al. 1647
Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595

BIOLOGICAL WIDTH
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
Surgical crown lengthening: evaluation of the biological width. Lanning SK, et al. 468

BIOMETRY
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126

BIRTH, PRETERM
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
Periodontal disease and preterm birth: results of a pilot intervention study. Jeffcoat MK, et al. 1214

BISPHOSPHONATES/therapeutic use
Combined local application of tetracycline and bisphosphonate reduces alveolar cone resorption in rats. Yaffe A, et al. 1038
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348
The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44
Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603

BLEEDING
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822

BLISTERING DISEASES
Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879

BLOOD TESTS
Blood test values and Community Periodontal Index scores in medical checkup recipients. Takami Y, et al. 1778

BLOOD VESSELS
Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521

BONE AND BONES
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454

Index

BONE AND BONES/anatomy and histology
Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945
Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483
BONE AND BONES/radiography
Digital image analysis of cadaver mandibular trabecular bone patterns. Shrout MK, et al. 1342
BONE, CRANIOFACIAL
Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787
Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865
BONE, DEMINERALIZED
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451
In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641
The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366
BONE DENSITY
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomizd rats. Duarte PM, et al. 1618
BONE, FREEZE-DRIED
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451
In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
BONE LOSS
Role of the microgap between implant and abutment: a retrospective histologic evaluation in monkeys. Piattelli A, et al. 346
BONE LOSS/prevention and control
Clinical and radiographic evaluation of soft and hard tissue changes around implants: a pilot study. Joly JC, et al. 1097
The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44
BONE LOSS/therapy
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
BONE MARROW
The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44
The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366
BONE RECONSTRUCTION
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44
BONE REGENERATION
Bucco-lingual bone remodeling around implants placed into immediate extraction sockets: a case series. Covani U, et al. 268
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Defect-determined regenerative options for treating periodontal intrabony defects in baboons. Blumenthal NM, et al. 10
Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648
Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023
Gene therapy of bone morphogenetic protein for periodontal tissue engineering. Jin Q-M, et al. 202

Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976

The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366

Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104

Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282

Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957

Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al.1143

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153

BONE REMODELING

Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145

Bucco-lingual bone remodeling around implants placed into immediate extraction sockets: a case series. Covani U, et al. 268

Mandibular bone remodeling under a choline-deficient diet: a histomorphometric study in rats. Gorustovich AA, et al. 831

Role of the microgap between implant and abutment: a retrospective histologic evaluation in monkeys. Piattelli A, et al. 346

BONE RESORPTION

Alveolar bone response in an experimental model of renal failure and periodontal disease: a histomorphometric and histochemical study. Mandalunis PM, et al. 1803

Characterization of biologically active cell surface components of a periodontal pathogen. The roles of major and minor fimbriae of *Porphyromonas gingivalis*. Umemoto T, et al. 119

Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and IL-6 production by human gingival fibroblasts. Tipton DA, et al. 1754

Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153

Role of the microgap between implant and abutment: a retrospective histologic evaluation in monkeys. Piattelli A, et al. 346

BONE RESORPTION/prevention and control

A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348

The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44

Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603

Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990

BONE SUBSTITUTES

Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al. 679

The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366

Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687

BULLAE

Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879

BURKITT'S LYMPHOMA

Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547

C

CADAVERS

Digital image analysis of cadaver mandibular trabecular bone patterns. Shrout MK, et al. 1342

CALCITONIN/therapeutic use

Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomized rats. Duarte PM, et al. 1618

CALCIUM

Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498

CALCIUM CARBONATE

Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957

CALCIUM PHOSPHATE

Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440

CALPROTECTIN

Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719

Index

CAMPYLOBACTER RECTUS
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
CARDIOVASCULAR DISEASES
Association between alveolar bone loss and elevated serum C-reactive protein in Japanese men. Saito T, et al. 1741
CELL COUNT
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336
CELL CULTURE
Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368
Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982
In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451
Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76
CELL SURVIVAL
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176
CELLS, ENDOTHELIAL
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
CELLS, ENDOTHELIAL/growth and development
Spatial extent of gingival cell activation due to mechanical stimulation by toothbrushing. Sakamoto T, et al. 585
CELLS, EPITHELIAL
Characterization of biologically active cell surface components of a periodontal pathogen. The roles of major and minor fimbriae of *Porphyromonas gingivalis*. Umemoto T, et al. 119
Molecular interaction of *Porphyromonas gingivalis* with host cells: implication for the microbial pathogenesis of periodontal disease. Amano A. 90
CELLS, EPITHELIAL/growth and development
Spreading of epithelial cells on machined and sandblasted titanium surfaces: an in vitro study. Di Carmine M, et al. 289
CELLS, GINGIVAL EPITHELIAL
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219
CELLS, MESENCHYME-DERIVED
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
CELLS, PERIODONTAL
Platelet-derived growth factor-BB stimulated cell migration mediated through p38 signal transduction pathway in periodontal cells. Ray AK, et al. 1320
CEMENTOBLASTS
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
CHEMILUMINESCENCE
Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219
CHEWING GUM
A pilot study on antiplaque effects of mastic chewing gum in the oral cavity. Takahashi K, et al. 501
CHILDREN
Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060
Periodontal diseases of children and adolescents. Position paper. 1696
Periodontal health, salivary status, and metabolic control in children with type 1 diabetes mellitus. Aren, G, et al. 1789
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
CHINESE
Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*. Tong KSK, et al. 1582
Lifestyle and psychosocial factors associated with chronic periodontitis in Taiwanese adults. Teng H-C, et al. 1169
Species-specific DNA probe for the detection of *Porphyromonas gingivalis* from adult Chinese periodontal patients and healthy subjects. Liu L, et al. 1000
CHLORHEXIDINE/therapeutic use
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Comparison of 2 commercially available chlorhexidine mouthrinses. Keijser JAM, et al. 214
Effects of chlorhexidine, minocycline, and metronidazole on *Porphyromonas gingivalis* Strain 381 in biofilms. Noiri Y, et al. 1647
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
Modulation of *Porphyromonas gingivalis* proteinase activity by suboptimal doses of antimicrobial agents. Grenier D, et al. 1316
Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420
A salivary incubation test for evaluation of oral malodor: a pilot study. Quirynen M, et al. 937
CHOLINE DEFICIENCY
Mandibular bone remodeling under a choline-deficient diet: a histomorphometric study in rats. Gorustovich AA, et al. 831
CLARIFICATION
Treatment of plaque-induced gingivitis, chronic periodontitis, and other clinical conditions (position paper). 1568. Clarification of J Perio 2001:72:1790
CLEANSING AGENTS
Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595

Index

CLEFT LIP/etiology
Cross-talk between interleukin-6 and transforming growth factor-regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
CLEFT PALATE/etiology
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
CLINICAL TRIALS
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Clinical outcome observed in subjects with recurrent periodontal disease following local treatment with 25% metronidazole gel. Jansson H, et al. 372
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Comparison of 2 commercially available chlorhexidine mouthrinses. Keijser JAM, et al. 214
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282
Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420
Species-specific DNA probe for the detection of *Porphyromonas gingivalis* from adult Chinese periodontal patients and healthy subjects. Liu L, et al. 1000
CLINICAL TRIALS, BLIND
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
CLINICAL TRIALS, CONTROLLED
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Distribution of interleukin-$1\beta^{+3954}$ and IL-$1\alpha^{-889}$ genetic variations in a Thai population group. Anusaksathien O, et al. 1796
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
Evaluation of p53, bcl-2, and interleukin-1 levels in gingival crevicular fluid of cyclosporin A- treated patients. Buduneli E, et al. 506
Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597
Lifestyle and psychosocial factors associated with chronic periodontitis in Taiwanese adults. Teng H-C, et al. 1169
Periodontal health, salivary status, and metabolic control inchildren with type 1 diabetes mellitus. Aren, G, et al. 1789
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
CLINICAL TRIALS, RANDOMIZED
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Long-term results of guided tissue regeneration therapy in the treatment of Class II furcation defects: a randomized clinical trial. Cury PR, et al. 3
A preliminary study on oxygen saturation levels of patients during periodontal surgery with and without oral conscious sedation using diazepam. Aeschliman SD, et al. 1056
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
COCAINE ABUSE
The influence of gingival margin recession on loss of clinical attachment in alcohol-dependent patients without medical disorders. Khocht A, et al. 485
COLLAGEN
Are cytokines linked to collagen breakdown during periodontal disease progression? Ejeil A-L, et al. 196
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects wwith non-syndromic cleft lip and palate. Baroni T, et al. 1447
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al.1143
COLLAGEN/therapeutic use
Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071

Index

Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990

Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687

COLLAGENASE

The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437

COMPARISON STUDIES

Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368

Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Çelenligil H, et al. 247

Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899

Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945

Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*. Tong KSK, et al. 1582

Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196

A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454

Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161

Comparison of 2 commercially available chlorhexidine mouthrinses. Keijser JAM, et al. 214

Conversion from cyclosporin A to tacrolimus as a non-surgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. —

Defect-determined regenerative options for treating periodontal intrabony defects in baboons. Blumenthal NM, et al. 10

Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838

Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175

Effect of non-surgical periodontal therapy on glycemic control in patients with type 2 diabetes mellitus. Rodrigues DC, et al. 1361

Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110

Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126

Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595

Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of an enamel matrix protein derivative. Sculean A, et al. 153

Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982

Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225

In vitro assessment of the plaque-removing ability of hydrodynamic shear forces produced beyond the bristles by 2 electric toothbrushes. Hope CK, et al. 1017

In vivo sensitivity of human root dentin to air blast and scratching. Camps J, et al. 1589

Meta-analysis of local tetracycline in treating chronic periodontitis. Pavia M, et al. 916

Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575

Periodontal referral patterns, 1980 versus 2000: a preliminary study. Cobb CM, et al. 1470

Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590

Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153

Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990

Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168

Scanning electron microscope evaluation of two methods of resharpening periodontal curets: a comparative study. Moses O, et al. 1032

CONNECTIVE TISSUE

Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808

Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242

CONNECTIVE TISSUE/anatomy and histology

Clinical and histologic aspects of dental implants removed due to mobility. Piattelli A, et al. 385

CONNECTIVE TISSUE/surgery

Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703

COORDINATION MEETING ON ORAL HEALTH AND SYSTEMIC HEALTH – PERIODONTAL MEDICINE: HEALTH POLICY IMPLICATIONS

Abstracts from the meeting. 1088

Consensus statement by participants. 1087

Index

Introduction. Genco RJ. 1080
Meeting summary. Geneva, Switzerland, December 5 and 6, 2002. Barnett ML. 1081
COX-2 INHIBITORS
Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and IL-6 production by human gingival fibroblasts. Tipton DA, et al. 1754
CROHN'S DISEASE
Altered healing following mucogingival surgery in a patient with Crohn's disease: a literature review and case report. Andersen K-M, et al. 537
CROWN LENGTHENING, SURGICAL
Surgical crown lengthening: evaluation of the biological width. Lanning SK, et al. 468
CYCLOSPORIN A
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Evaluation of p53, bcl-2, and interleukin-1 levels in gingival crevicular fluid of cyclosporin A-treated patients. Buduneli E, et al. 506
CYCLOSPORIN A/adverse effects
Conversion from cyclosporin A to tacrolimus as a non-surgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51
Cyclosporin A induces proliferation in human gingival fibroblasts via induction of transforming growth factor-β1. Cotrim P, et al. 1625
The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747
Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
CYSTEINE PROTEINASE
The role of gingipains in the pathogenesis of periodontal disease. Imamura T. 111
CYSTS, GINGIVAL/etiology
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
CYTOKINES
Are cytokines linked to collagen breakdown during periodontal disease progression? Ejeil A-L, et al. 196
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102
CYTOTOXICITY
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219

D

DATA COLLECTION
Evidence-based mucogingival therapy. Part 1: a critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
DECISION MAKING
Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
DENTAL CALCULUS/adverse effects
Treatment of plaque-induced gingivitis, chronic periodontitis, and other clinical conditions (Position paper). 1568 Clarification of J. Perio. 2001:72:1790
DENTAL CALCULUS/prevention and control
Effects of 2.94 μmer:YAG laser radiation on root surfaces treated *in situ*: a histological study. Folwaczny M, et al. 360
DENTAL CEMENTUM
Gene therapy of bone morphogenetic protein for periodontal tissue engineering. Jin Q-M, et al. 202
Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808
Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458
DENTAL EQUIPMENT
Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595
DENTAL ESTHETICS
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
The segmental ridge-split procedure. Coatoam GW, et al. 757
Vertical distance from the crest of bone to the height of the interproximal papilla between adjacent implants. Tarnow D, et al. 1785

Index

DENTAL IMPLANTATION
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402
Vertical distance from the crest of bone to the height of the interproximal papilla between adjacent implants. Tarnow D, et al. 1785
DENTAL IMPLANTATION, ENDOSSEOUS/methods
Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648
Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575
DENTAL IMPLANTS
Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225
Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976
The segmental osteotomy in the management of malposed implants. A case report and literature review. Kassolis JD, et al. 529
The segmental ridge-split procedure. Coatoam GW, et al. 757
Spreading of epithelial cells on machined and sandblasted titanium surfaces: an in vitro study. Di Carmine M, et al. 289
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338
DENTAL IMPLANTS/adverse effects
Mandibular fracture caused by peri-implant bone loss: report of a case. Meijer HJA, et al. 1067
Role of the microgap between implant and abutment: a retrospective histologic evaluation in monkeys. Piattelli A, et al. 346
DENTAL IMPLANTS, ENDOSSEOUS
Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483
Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575
DENTAL IMPLANTS, FAILURE
Clinical and histologic aspects of dental implants removed due to mobility. Piattelli A, et al. 385
Five-year clinical, microbiological, and radiological outcome following treatment of peri- implantitis in man. Leonhardt Å, et al. 1415
Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225
Peripheral giant cell granuloma associated with dental implants. Hirshberg A, et al. 1381
Transforming growth factor-beta 1 expression in the peri-implant soft tissues of healthy and failing dental implants. Cornelini R, et al. 446
DENTAL IMPLANTS, IMMEDIATE
Bucco-lingual bone remodeling around implants placed into immediate extraction sockets: a case series. Covani U, et al. 268
Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al. 679
Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402
Radiologic and histomorphometric evaluation of maxillary sinus grafting with alloplastic graft materials. Ozyuvaci H, et al. 909
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
DENTAL IMPLANTS, IMMEDIATE LOADING
Early functional loading at 5 days for Brånemark implants placed into edentulous mandibles: a prospective, open-ended, longitudinal study. Becker,W, et al 695
Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225
Peri-implant soft tissue integration of immediately loaded implants in the posterior macaque mandible: a histomorphometric study. Siar CH, et al. 571
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
DENTAL INSTRUMENTS
Effect of loading on the vibration characteristics of thin magnetostrictive ultrasonic scaler inserts. Trenter SC, et al. 1308
Scanning electron microscope evaluation of two methods of resharpening periodontal curets: a comparative study. Moses O, et al. 1032
DENTAL MATERIALS
Radiologic and histomorphometric evaluation of maxillary sinus grafting with alloplastic graft materials. Ozyuvaci H, et al. 909
Subgingival plaque removal at interdental sites using a low-abrasive air polishing powder. Petersilka GJ, et al. 307

Index

DENTAL OCCLUSION, TRAUMATIC
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145
DENTAL OFFICES
Periodontal referral patterns, 1980 versus 2000: a preliminary study. Cobb CM, et al. 1470
DENTAL PAPILLA
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
DENTAL PAPILLA/anatomy and histology
Vertical distance from the crest of bone to the height of the interproximal papilla between adjacent implants. Tarnow D, et al. 1785
DENTAL PLAQUE/adverse effects
Treatment of plaque-induced gingivitis, chronic periodontitis, and other clinical conditions. Position paper. 1568 Clarification of J. Perio. 2001:72:1790
DENTAL PLAQUE/microbiology
Detection of *Tannerella forsythensis (Bacteroides forsythus)* and *Porphyromonas gingivalis* by polymerase chain reaction in subjects with different periodontal status. Klein MI, et al. 798
DENTAL PLAQUE/prevention and control
Comparison of 2 commercially available chlorhexidine mouthrinses. Keijser JAM, et al. 214
In vitro assessment of the plaque-removing ability of hydrodynamic shear forces produced beyond the bristles by 2 electric toothbrushes. Hope CK, et al. 1017
A pilot study on antiplaque effects of mastic chewing gum in the oral cavity. Takahashi K, et al. 501
Subgingival plaque removal at interdental sites using a low-abrasive air polishing powder. Petersilka GJ, et al. 307
DENTAL PROPHYLAXIS
Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060
Subgingival plaque removal at interdental sites using a low-abrasive air polishing powder. Petersilka GJ, et al. 307
DENTAL PULP
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
DENTIN/anatomy and histology
Permeability and morphology of dentin after erosion induced by acidic drinks. Prati C, et al. 428
DENTIN, SENSITIVE/therapy
In vivo sensitivity of human root dentin to air blast and scratching. Camps J, et al. 1589
DENTISTRY
New directions in dentistry-the role of the National Institute of Dental and Craniofacial Research. Tabak LA. 65
DENTOGINGIVAL COMPLEX
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
DENTURE, PROVISIONAL
Early functional loading at 5 days for Brånemark implants placed into edentulous mandibles: a prospective, open-ended, longitudinal study. Becker W, et al. 695
DIABETES MELLITUS
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
DIABETES MELLITUS/complications
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610
DIABETES MELLITUS, INSULIN-DEPENDENT
Periodontal health, salivary status, and metabolic control in children with type 1 diabetes mellitus. Aren, G, et al. 1789
DIABETES MELLITUS, NON-INSULIN DEPENDENT
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
Association between alveolar bone loss and elevated serum C-reactive protein in Japanese men. Saito T, et al. 1741
Effect of non-surgical periodontal therapy on glycemic control in patients with type 2 diabetes mellitus. Rodrigues DC, et al. 1361
Periodontal disease and diabetes mellitus: the role of tumor necrosis factor- in a 2-way relationship. Nishimura F, et al. 97
DIAGNOSIS, ORAL
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145
DIAGNOSIS, ORAL/methods
Partial-mouth assessment of periodontal disease in an adult population of the United States. Owens JD, et al. 1206
DIAZEPAM/therapeutic use
A preliminary study on oxygen saturation levels of patients during periodontal surgery with and without oral conscious sedation using diazepam. Aeschliman SD, et al. 1056
DISEASE PROGRESSION
Are cytokines linked to collagen breakdown during periodontal disease progression? Ejeil A-L, et al. 196
Clinical and microbiologic study of periodontitis associated with Kindler syndrome. Wiebe CB, et al. 25
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
DISINFECTION
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312
DNA PROBE
Species-specific DNA probe for the detection of *Porphyromonas gingivalis* from adult Chinese periodontal patients and healthy subjects. Liu L, et al. 1000
DOUBLE-BLIND METHOD
Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597
A pilot study on antiplaque effects of mastic chewing gum in the oral cavity. Takahashi K, et al. 501

Index

E

EDITORIAL 1542, 1692
ELASTASE
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
ENAMEL MATRIX DERIVATIVE
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
Effects of enamel matrix derivative on *Porphyromonas gingivalis*. Newman SA, et al. 1191
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of an enamel matrix protein derivative. Sculean A, et al. 153
Periodontal regeneration with a combination of enamel matrix proteins and autogenous bone grafts. Cochran DL, et al. 1269
EPITHELIAL-MESENCHYMAL INTERACTIONS
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
EPITHELIUM
Adhesion of *Porphyromonas gingivalis* serotypes to pocket epithelium. Dierickx K, et al. 644
Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Çelenligil H, et al. 247
Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242
ERRATUM
Pini Prato GP, et al. 567 (2003;74:262-267)
ESTROGEN/therapeutic use
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomized rats. Duarte PM, et al. 1618
ESTROGEN DEFICIENCY
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomizd rats. Duarte PM, et al. 1618
ETHANOL/metabolism
Mouthrinses with alcohol; cytotoxic effects on human gingival fibroblasts in vitro. Poggi P, et al. 623
ETHNICITY
Distribution of periodontal pathogens in Korean aggressive periodontitis. Lee J-W, et al. 1329
EXTRACELLULAR MATRIX
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437
Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

F

FIBRIN
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
FIBRINOGEN
Association of increased levels of fibrinogen and the –455G/A fibrinogen gene polymorphism with chronic periodontosis. Sahingur SE, et al. 329
FIBROBLASTS
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
Hereditary gingival fibromatosis and expression of Ki-67 antigen: a case report. Saygun I, et al. 873
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458
FIBROBLASTS, GINGIVAL
Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368
Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory, et al. 1771
Cyclosporin A induces proliferation in human gingival fibroblasts via induction of transforming growth factor-β1. Cotrim P, et al. 1625
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219
The effects of progesterone on matrix metalloproteinases in cultured human gingival fibroblasts. Lapp CA, et al. 277
Mouthrinses with alcohol; cytotoxic effects on human gingival fibroblasts in vitro. Poggi P, et al. 623
Platelet-derived growth factor-BB stimulated cell migration mediated through p38 signal transduction pathway in periodontal cells. Ray AK, et al. 1320
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176
FIBROBLASTS, GINGIVAL/growth and development
Optimum force and duration of toothbrushing to enhance gingival fibroblast proliferation and procollagen Type I synthesis in dogs. Tomofuji T, et al. 630
Spatial extent of gingival cell activation due to mechanical stimulation by toothbrushing. Sakamoto T, et al. 585
FIBROBLASTS, PERIODONTAL
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391

Index

Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and IL-6 production by human gingival fibroblasts. Tipton DA, et al. 1754
Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176
FIBROMATOSIS, GINGIVAL
A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
Hereditary gingival fibromatosis and expression of Ki-67 antigen: a case report. Saygun I, et al. 873
FIBRONECTIN
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822
FIMBRIAE, BACTERIAL
Characterization of biologically active cell surface components of a periodontal pathogen. The roles of major and minor fimbriae of *Porphyromonas gingivalis*. Umemoto T, et al. 119
Interactions of *Porphyromonas gingivalis* with host cells: implications for cardiovascular diseases. Kuramitsu HK, et al. 85
Molecular interaction of *Porphyromonas gingivalis* with host cells: implication for the microbial pathogenesis of periodontal disease. Amano A. 90
Relationship between transmission of *Porphyromonas gingivalis* and *FimA* type in spouses. Asano H, et al. 1355
FMLP (N-FORMYLMETHIONYL-LEUCYL-PHENYLALANINE)
Mutations of F110 and C126 of the formyl peptide receptor interfere with G-protein coupling and chemotaxis. Jones BE, et al. 475
FOLLOW-UP STUDIES
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Clinical and radiographic evaluation of soft and hard tissue changes around implants: a pilot study. Joly JC, et al. 1097.
Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*.Tong KSK, et al. 1582
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Conversion from cyclosporin A to tacrolimus as a non-surgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
Crown lengthening in mandibular molars: a 5-year retrospective radiographic analysis. Dibart S, et al. 815
Early functional loading at 5 days for Brånemark implants placed into edentulous mandibles: a prospective, open-ended, longitudinal study. Becker,W, et al. 695
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt Å, et al. 1415
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide- cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
Long-term results of guided tissue regeneration therapy in the treatment of Class II furcation defects: a randomized clinical trial. Cury PR, et al. 3
Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104
Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575
Periodontal regeneration with a combination of enamel matrix proteins and autogenous bone grafts. Cochran DL, et al. 1269
Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al.1143
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
Untreated periodontal disease: a follow-up on 30 cases. Harris RJ. 672
FOREIGN BODIES
Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023
FURCATION/etiology
Crown lengthening in mandibular molars: a 5-year retrospective radiographic analysis. Dibart S, et al. 815

Index

FURCATION/prevention and control
Crown lengthening in mandibular molars: a 5-year retrospective radiographic analysis. Dibart S, et al. 815
FURCATION/surgery
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
FURCATION/therapy
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579
Long-term results of guided tissue regeneration therapy in the treatment of Class II furcation defects: a randomized clinical trial. Cury PR, et al. 3
Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282
FUTUROLOGY
Modern periodontology – new directions in the 21st century. Genco RJ. 64
New directions in dentistry – the role of the National Institute of Dental and Craniofacial Research. Tabak LA. 65

G

GELATIN/therapeutic use
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
GENE EXPRESSION
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747
GENOTYPE
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
Association of increased levels of fibrinogen and the –455G/A fibrinogen gene polymorphism with chronic periodontosis. Sahingur SE, et al. 329
Risk of periodontitis in systemic lupus erythematosus is associated with Fcγ receptor polymorphisms. Kobayashi T, et al. 378
Subgingival microflora in Turkish patients with periodontitis. Dogan B, et al. 803
GINGIPAINS
Antibody responses of periodontitis patients to gingipains of *Porphyromonas gingivalis*. Inagaki S, et al. 1432
The role of gingipains in the pathogenesis of periodontal disease. Imamura T. 111
GINGIVA
Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242
GINGIVA/analysis
Effects of selective cyclooxygenase-2 inhibition on gingival tissue levels of prostaglandin E_2 and prostaglandin $F_{2\alpha}$ and clinical parameters of chronic periodontitis. Vardar S, et al. 57
GINGIVA/anatomy and histology
Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Celenligil H, et al. 247
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822
GINGIVA/physiology
Quantification and localization of platelet-derived growth factor in gingiva of periodontitis patients. Pinheiro MLB, et al. 323
GINGIVA/surgery
An autologous cell hyaluronic acid graft technique for gingival augmentation: a case series. Pini Prato GP, et al. 262
GINGIVAL CREVICULAR FLUID/analysis
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145
Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175
Evaluation of p53, bcl-2, and interleukin-1 levels in gingival crevicular fluid of cyclosporin A- treated patients. Buduneli E, et al. 506
β-Glucuronidase activity in saliva: relationship to clinical periodontal parameters. Lamster I, et al. 353
Impact of increased occlusal contact, interleukin-1 genotype, and periodontal severity on gingival crevicular fluid IL-1β levels. McDevitt MJ, et al. 1302
GINGIVAL DISEASES
Transforming growth factor-beta 1 expression in the periimplant soft tissues of healthy and failing dental implants. Cornelini R, et al. 446
GINGIVAL HYPERPLASIA
Hereditary gingival fibromatosis and expression of Ki-67 antigen: a case report. Saygun I, et al. 873
Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547
GINGIVAL HYPERPLASIA/complications
Granulocytic sarcoma of gingiva: an unusual case with aleukemic presentation. Antmen B, et al. 1514
GINGIVAL HYPERPLASIA/epidemiology
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51

Index

GINGIVAL HYPERPLASIA/etiology
Conversion from cyclosporin A to tacrolimus as a non-surgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51
Evaluation of p53, bcl-2, and interleukin-1 levels in gingival crevicular fluid of cyclosporin A- treated patients. Buduneli E, et al. 506
Recurrent recalcitrant gingival hyperplasia and plasminogen deficiency: a case report. Suresh L, et al. 1508
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
GINGIVAL HYPERPLASIA/pathogenesis
Cyclosporin A induces proliferation in human gingival fibroblasts via induction of transforming growth factor-β1. Cotrim P, et al. 1625
The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747
GINGIVAL HYPERPLASIA/therapy
Conversion from cyclosporin A to tacrolimus as a non-surgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
GINGIVAL PIGMENTATION
Gingival depigmentation by Erbium:YAG laser: clinical observations and patient responses. Tal H, et al. 1660
GINGIVAL RECESSION/surgery
Altered healing following mucogingival surgery in a patient with Crohn's disease: a literature review and case report. Andersen K-M, et al. 537
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
Gingival/soft tissue abscess following subepithelial connective tissue graft to root coverage: report of three cases/Vastardis S, et al. 1676
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
GINGIVAL RECESSION/therapy
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
Gingival/soft tissue abscess following subepithelial connective tissue graft to root coverage: report of three cases/ Vastardis S, et al. 1676
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168
GINGIVITIS/epidemiology
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336
GINGIVITIS/therapy
Efficacy of subgingival irrigation using herbal extracts on gingival inflammation. Pistorius A, et al. 616
Treatment of plaque-induced gingivitis, chronic periodontitis, and other clinical conditions. Position paper. 1568 Clarification of J. Perio. 2001:72:1790
GINGIVITIS, DESQUAMATIVE
Oral features of mucocutaneous disorders (Position paper). 1545
Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879
GINGIVITIS, PREGNANCY
The effects of progesterone on matrix metalloproteinases in cultured human gingival fibroblasts. Lapp CA, et al. 277
GLASS, BIOLOGICALLY ACTIVE
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
GLUCOSE/metabolism
Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory, et al. 1771
GLUCURONIDASE
β-Glucuronidase activity in saliva: relationship to clinical periodontal parameters. Lamster I, et al. 353
GLYCEROL
In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641
GLYCOSAMINOGLYCANS
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects wwith nonsyndromic cleft lip and palate. Baroni T, et al. 1447

Index

GRAFT-VERSUS-HOST DISEASE
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
GRAFTS
An autologous cell hyaluronic acid graft technique for gingival augmentation: a case series. Pini Prato GP, et al. 262
GRAFTS, BONE
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Defect-determined regenerative options for treating periodontal intrabony defects in baboons. Blumenthal NM, et al. 10
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al. 679
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982
In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451
In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641
Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282
Periodontal regeneration with a combination of enamel matrix proteins and autogenous bone grafts. Cochran DL, et al. 1269
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al. 1143
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
The segmental ridge-split procedure. Coatoam GW, et al. 757
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687
GRAFTS, CALCIUM HYDROXIDE
Evaluation of hard tissue replacement composite graft material as a ridge preservation/augmentation material in conjunction with immediate hydroxyapatite-coated dental implants. Yukna RA, et al. 679
GRAFTS, CONNECTIVE TISSUE
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
Gingival/soft tissue abscess following subepithelial connective tissue graft to root coverage: report of three cases/Vastardis S, et al. 1676
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
The subepithelial connective tissue graft with a vestibular releasing incision. Butler BL. 893
GRAFTS, GINGIVAL
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
GRAFTS, GINGIVAL/complications
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
GRAFTS, SOFT TISSUE
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
GRAFTS, SOFT TISSUE/complications
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
GRAFTS, SUBEPITHELIAL
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
The subepithelial connective tissue graft with a vestibular releasing incision. Butler BL. 893
GRANULOMA, GIANT CELL/epidemiology
Peripheral giant cell granuloma associated with dental implants. Hirshberg A, et al. 1381
GROWTH FACTORS, FIBROBLAST
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498

Index

GROWTH FACTORS, INSULIN-LIKE
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176
GROWTH FACTORS, PLATELET-DERIVED
In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451
Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
Platelet-derived growth factor-BB stimulated cell migration mediated through p38 signal transduction pathway in periodontal cells. Ray AK, et al. 1320
Quantification and localization of platelet-derived growth factor in gingiva of periodontitis patients. Pinheiro MLB, et al. 323
GROWTH FACTORS, PLATELET-RICH
Platelet-rich plasma contains high levels of platelet-derived growth factor and transforming growth factor-β and modulates the proliferation of periodontally related cells in vitro. Okuda K, et al. 849
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
GROWTH FACTORS, TRANSFORMING
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
Cyclosporin A induces proliferation in human gingival fibroblasts via induction of transforming growth factor-β1. Cotrim P, et al. 1625
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
Platelet-rich plasma contains high levels of platelet-derived growth factor and transforming growth factor-β and modulates the proliferation of periodontally related cells in vitro. Okuda K, et al. 849
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
Transforming growth factor-beta 1 expression in the peri-implant soft tissues of healthy and failing dental implants. Cornelini R, et al. 446
GROWTH FACTORS, VASCULAR ENDOTHELIAL
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
GUIDED BONE REGENERATION
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite- coated implants in the canine model. Conner KA, et al. 658
Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338
GUIDED TISSUE REGENERATION
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Defect-determined regenerative options for treating periodontal intrabony defects in baboons. Blumenthal NM, et al. 10
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579
Long-term results of guided tissue regeneration therapy in the treatment of Class II furcation defects: a randomized clinical trial. Cury PR, et al. 3
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168

Index

H

HALITOSIS
A salivary incubation test for evaluation of oral malodor: a pilot study. Quirynen M, et al. 937
HALITOSIS/etiology
The relationship between volatile sulfur compounds and major halitosis-inducing factors. Lee C-H, et al. 32
HEALTH, GENERAL
Association of periodontal status with general health conditions and serum antibody titers for *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. Furuichi Y, et al. 1491
HEALTH POLICY
Coordination meeting, 2002. 1080
HELICOBACTER PYLORI
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
High prevalence of *Helicobacter pylori* detected by PCR in the oral cavities of periodontitis patients. Umeda M, et al. 129
A pilot study on antiplaque effects of mastic chewing gum in the oral cavity. Takahashi K, et al. 501
HEMAGGLUTININ
Human monoclonal antibody inhibits *Porphyromonas gingivalis* hemagglutinin activity. Kaizuka K, et al. 38
HEMOGLOBIN, GLYCATED
Effect of non-surgical periodontal therapy on glycemic control in patients with type 2 diabetes mellitus. Rodrigues DC, et al. 1361
HERBAL EXTRACTS/therapeutic use
Efficacy of subgingival irrigation using herbal extracts on gingival inflammation. Pistorius A, et al. 616
HERPESVIRUS/epidemiology
Prevalence of human herpesviruses in patients with aggressive periodontitis. Yapar M, et al. 1634
HIV INFECTIONS
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336
HORMONES
Consideration of systemic hormone status when treating patients with osteopenia (Guest editorial). Boyan BD, et al. 1692
HOST RESPONSE
Molecular interaction of *Porphyromonas gingivalis* with host cells: implication for the microbial pathogenesis of periodontal disease. Amano A. 90
Neutrophil-mediated tissue injury in periodontal disease pathogenesis: findings from localized aggressive periodontitis. Kantarci A, et al. 66
HYDROXAMIC ACIDS
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219
HYDROXYAPATITE
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458
HYDROXYAPATITE/therapeutic use
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
HYPERGLYCEMIA
Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory M, et al. 1771
HYPERTELORISM
A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225
HYPOPLASMINOGENEMIA
Recurrent recalcitrant gingival hyperplasia and plasminogen deficiency: a case report. Suresh L, et al. 1508

I

IgA DISEASES, LINEAR
Two cases of linear IgA disease with clinical manifestations limited to the gingiva. Del Valle AE, et al. 879
IgG
Prostaglandin E_2-mediated regulation of immunoglobulin G2 via interferon gamma. Tanaka S, et al. 771
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007
Risk of periodontitis in systemic lupus erythematosus is associated with Fcγ receptor polymorphisms. Kobayashi T, et al. 378
IMMUNE RESPONSE
Association of increased levels of fibrinogen and the –455G/A fibrinogen gene polymorphism with chronic periodontosis. Sahingur SE, et al. 329
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102
Prostaglandin E_2-mediated regulation of immunoglobulin G2 via interferon gamma. Tanaka S, et al. 771
IMMUNOMAGNETIC SEPARATION
Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780
IMMUNOTHERAPY, PASSIVE
Human monoclonal antibody inhibits *Porphyromnas gingivalis* hemagglutinin activity. Kaizuka K, et al. 38
IMPLANTS
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomizd rats. Duarte PM, et al. 1618
INCADRONATE/therapeutic use
Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603
INDOMETHACIN
Prostaglandin E_2-mediated regulation of immunoglobulin G2 via interferon gamma. Tanaka S, et al. 771
INFECTION/prevention and control
Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595

Index

Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579

INFLAMMATION
Are cytokines linked to collagen breakdown during periodontal disease progression? Ejeil A-L, et al. 196
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242

INFLAMMATORY RESPONSE
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391
Quantification and localization of platelet-derived growth factor in gingiva of periodontitis patients. Pinheiro MLB, et al. 323

INSULIN/metabolism
Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory M, et al. 1771

INSULIN RESISTANCE
Periodontal disease and diabetes mellitus: the role of tumor necrosis factor- in a 2-way relationship. Nishimura F, et al. 97

INTERFERON
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296

INTERFERON GAMMA
Prostaglandin E_2 -mediated regulation of immunoglobulin G2 via interferon gamma. Tanaka S, et al. 771

INTERLEUKIN-1
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391
Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and interleukin-6 production by human gingival fibroblasts. Tipton DA, et al. 1754
Distribution of interleukin-$1\beta^{+3954}$ and IL-$1\alpha^{-889}$ genetic variations in a Thai population group. Anusaksathien O, et al. 1796
Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719
Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175
Impact of increased occlusal contact, interleukin-1 genotype, and periodontal severity on gingival crevicular fluid IL-1β levels. McDevitt MJ, et al. 1302
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102

INTERLEUKIN-6
Cross-talk between interleukin-6 and transforming growth factor-β_3 regulates extracellular matrix production by human fibroblasts from subjects with non-syndromic cleft lip and palate. Baroni T, et al. 1447
Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and IL-6 production by human gingival fibroblasts. Tipton DA, et al. 1754
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102

IRRIGATION, SUBGINGIVAL
Efficacy of subgingival irrigation using herbal extracts on gingival inflammation. Pistorius A, et al. 616

ISOLUMINOL
Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219

J

JAPANESE
Association between alveolar bone loss and elevated serum C-reactive protein in Japanese men. Saito T, et al. 1741
Association of periodontal status with general health conditions and serum antibody titers for *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. Furuichi Y, et al. 1491
Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060
Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460

JAW FRACTURES/therapy
Mandibular fracture caused by peri-implant bone loss: report of a case. Meijer HJA, et al. 1067

JOINT INSTABILITY
A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225

JORDANIANS
Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610

JOURNAL OF PERIODONTOLOGY
FDA Report. 1569
Instructions to authors. 135

JOURNAL WATCH 1, 275, 569, 935, 1253, 1573

JOURNALISM, DENTAL
Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741

Index

K

KAPOSI SARCOMA/complications
Oral Kaposi sarcoma associated with severe alveolar bone loss: case report and review of the literature. Lausten LL, et al. 1668
KERATINOCYTES
Spreading of epithelial cells on machined and sandblasted titanium surfaces: an in vitro study. Di Carmine M, et al. 289
KIDNEY FAILURE/complications
Alveolar bone response in an experimental model of renal failure and periodontal disease: a histomorphometric and histochemical study. Mandalunis PM, et al. 1803
KIDNEY TRANSPLANTATION/complications
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747
KINDLER SYNDROME
Clinical and microbiologic study of periodontitis associated with Kindler syndrome. Wiebe CB, et al. 25
KOREANS
Distribution of periodontal pathogens in Korean aggressive periodontitis. Lee J-W, et al. 1329

L

LABOR, PREMATURE
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
LASERS/therapeutic use
Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175
Effects of 2.94 μmer:YAG laser radiation on root surfaces treated *in situ*: a histological study. Folwaczny M, et al. 360
Gingival depigmentation by Erbium:YAG laser: clinical observations and patient responses. Tal H, et al. 1660
Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590
LETTER TO THE EDITOR 566, 1394, 1694, 1824
LEUKEMIA, B-CELL, ACUTE
Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547
LEUKEMIA, LYMPHOBLASTIC, ACUTE
Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547
LICHEN PLANUS, ORAL
Lichen planus and vulvovaginal syndrome. Ramer MA, et al. 1385
LIPOXIN
Neutrophil-mediated tissue injury in periodontal disease pathogenesis: findings from localized aggressive periodontitis. Kantarci A, et al. 66
LITERATURE, DENTAL
Periodontal terminology revisited. Weinberg MA, et al. 563, 1394
LIVER TRANSPLANTATION
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
LONGITUDINAL STUDY
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145
Reliability of clinical attachment level recordings: effects on prevalence, extent, and severity estimates. López R, et al. 512
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
LUMINOL
Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219

M

MALOCCLUSION/therapy
The segmental osteotomy in the management of malposed implants. A case report and literature review. Kassolis JD, et al. 529
MANDIBLE/radiography
Digital image analysis of cadaver mandibular trabecular bone patterns. Shrout MK, et al. 1342
MANDIBULAR FRACTURES/therapy
Mandibular fracture caused by peri-implant bone loss: report of a case. Meijer HJA, et al. 1067
MANDIBULAR NERVE
Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887
MAXILLA, ATROPHIC/surgery
Radiologic and histomorphometric evaluation of maxillary sinus grafting with alloplastic graft materials. Ozyuvaci H, et al. 909
MAXILLA, ATROPHIC/therapy
Radiologic and histomorphometric evaluation of maxillary sinus grafting with alloplastic graft materials. Ozyuvaci H, et al. 909
MAXILLARY SINUS/surgery
Augmentation of the posterior maxilla: a proposed hierarchy of treatment selection. Fugazzotto PA. 1682
A simplified classification and repair system for sinus membrane perforations. Fugazzotto PA, et al. 1534
MAXILLARY SINUS AUGMENTATION
A simplified classification and repair system for sinus membrane perforations. Fugazzotto PA, et al. 1534
MELANINS
Gingival depigmentation by Erbium:YAG laser: clinical observations and patient responses. Tal H, et al. 1660

Index

MEMBRANES, ARTIFICIAL
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
MEMBRANES, BARRIER
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402
Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al. 1143
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168
Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687
MEMBRANES, BIOABSORBABLE
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411
Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
Guided tissue regeneration in human Class II furcation defects using a diphenylphosphorylazide-cross-linked collagen membrane: a consecutive case series. Zahedi CS, et al. 1071
Periodontal repair in dogs: a bioabsorbable calcium carbonate coral implant enhances space provision for alveolar bone regeneration in conjunction with guided tissue regeneration. Wikesjö UME, et al. 957
Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153
Treatment of angular bone defects with a composite bone grafting material in combination with a collagen membrane. Zitzmann NU, et al. 687
META-ANALYSIS
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
METABOLIC CONTROL
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
METALLOPROTEINASE TISSUE INHIBITORS, MATRIX
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181
METALLOPROTEINASES, MATRIX
Effect of hydroxamic acid-based matrix metalloproteinase inhibitors on human gingival cells and *Porphyromonas gingivalis*. Yoshioka M, et al. 1219
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437

Index

The effects of progesterone on matrix metalloproteinases in cultured human gingival fibroblasts. Lapp CA, et al. 277

Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296

Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

METALLOPROTEINASES, TRANSMEMBRANE

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

METRONIDAZOLE/therapeutic use

Clinical outcome observed in subjects with recurrent periodontal disease following local treatment with 25% metronidazole gel. Jansson H, et al. 372

Effects of chlorhexidine, minocycline, and metronidazole on *Porphyromonas gingivalis* Strain 381 in biofilms. Noiri Y, et al. 1647

Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579

MINOCYCLINE/adverse effects

Effects of chlorhexidine, minocycline, and metronidazole on *Porphyromonas gingivalis* Strain 381 in biofilms. Noiri Y, et al. 1647

Minocycline-induced staining of torus palatinus and alveolar bone. Ayangco L, et al. 669

MODELS, ANIMAL

Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023

The influence of alendronate on bone formation and resorption in a rat ectopic bone development model. Yaffe A, et al. 44

The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

MODELS, BIOLOGICAL

Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440

MODELS, DENTAL

In vitro assessment of the plaque-removing ability of hydrodynamic shear forces produced beyond the bristles by 2 electric toothbrushes. Hope CK, et al. 1017

MOLAR

Crown lengthening in mandibular molars: a 5-year retrospective radiographic analysis. Dibart S, et al. 815

MOLAR, THIRD

Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887

MONOCYTES/physiopathology

Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719

MOUTH MUCOSA/surgery

An autologous cell hyaluronic acid graft technique for gingival auugmentation: a case series. Pini Prato GP, et al. 262

MOUTH REHABILITATION

Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255

MOUTHWASHES/adverse effects

Mouthrinses with alcohol: cytotoxic effects on human gingival fibroblasts in vitro. Poggi P, et al. 623

MOUTHWASHES/therapeutic use

Comparison of 2 commercially available chlorhexidine mouthrinses. Keijser JAM, et al. 214

Efficacy of subgingival irrigation using herbal extracts on gingival inflammation. Pistorius A, et al. 616

A salivary incubation test for evaluation of oral malodor: a pilot study. Quirynen M, et al. 937

MUCOCUTANEOUS LESIONS

Oral features of mucocutaneous disorders. Position paper. American Academy of Periodontology. 1545

MUCOGINGIVAL SURGERY

Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709

Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741

N

NACRE/therapeutic use

The influence of nacre surface and its modification on bone apposition: a bone development model in rats. Baha H, et al. 366

NAILS, MALFORMED

A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225

NAPROXEN

Effects of selective cyclooxygenase-2 inhibition on gingival tissue levels of prostaglandin E_2 and prostaglandin $F_{2\alpha}$ and clinical parameters of chronic periodontits. Vardar S et al. 57

NATIONAL INSTITUTE OF DENTAL AND CRANIOFACIAL RESEARCH

New directions in dentistry – the role of the National Institute of Dental and Craniofacial Research. Tabak LA. 65

Obesity and perodontal disease in youth, middle-aged, and older adults. Al-Zahrani MS, et al. 610

NEUTROPHILS

Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475

Index

β-Glucuronidase activity in saliva: relationship to clinical periodontal parameters. Lamster I, et al. 353
Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603
Mutations of F110 and C126 of the formyl peptide receptor interfere with G-protein coupling and chemotaxis. Jones BE, et al. 475
NEUROTROPHIN RECEPTOR
Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76
NEUROTROPHINS
Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76
NEUTROPHILS
Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219
Neutrophil-mediated tissue injury in periodontal disease pathogenesis: findings from localized aggressive periodontitis. Kantarci A, et al. 66
NICOTINE/adverse effects
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440
NICOTINE/metabolism
Anabolic potential of fibroblasts from chronically inflamed gingivae grown in hyperglycemic culture medium in the presence or absence of insulin and nicotine. Soory M, et al. 1771
NIMESULIDE
Effects of selective cyclooxygenase-2 inhibition on gingival tissue levels of prostaglandin E_2 and prostaglandin $F_{2\alpha}$ and clinical parameters of chronic periodontitis. Vardar S, et al. 57
NOMENCLATURE
Periodontal terminology revisited. Weinberg MA, et al. 563, 1394
NUMB CHIN SYNDROME
Severe alveolar bone loss and gingival hyperplasia as initial manifestation of Burkitt cell type acute lymphoblastic leukemia. Haytac MC, et al. 547

O

OBESITY
Periodontal disease and diabetes mellitus: the role of tumor necrosis factor- in a 2-way relationship. Nishimura F, et al. 97
OBESITY/epidemiology
Obesity and perodontal disease in youth, middle-aged, and older adults. Al-Zahrani MS, et al. 610
ODONTOBLASTS
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
ODONTOGENIC CYST
Ameloblastoma of the mandible: a case report. Levin MP, et al. 883
ODONTOGENIC KERATOCYST
Ameloblastoma of the mandible: a case report. Levin MP, et al. 883
ODONTOGENIC TUMORS
Ameloblastoma of the mandible: a case report. Levin MP, et al. 883
OFFICE MANAGEMENT
Periodontal referral patterns, 1980 versus 2000: a preliminary study. Cobb CM, et al. 1470
ORAL CAVITY/microbiology
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
High prevalence of *Helicobacter pylori* detected by PCR in the oral cavities of periodontitis patients. Umeda M, et al. 129
ORAL HEALTH
Coordination Meeting, 2002. 1080
Periodontal health, salivary status, and metabolic control inchildren with type 1 diabetes mellitus. Aren, G, et al. 1789
ORAL HYGIENE
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312
Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610
ORAL MUCOSA
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
ORGAN TRANSPLANTATION/complications
Conversion from cyclosporin A to tacrolimus as a nonsurgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
ORTHODONTIC TREATMENT
Aspartate transaminase activity in gingival crevicular fluid during orthodontic treatment. A controlled short-term longitudinal study. Perinetti G, et al. 145
ORTHODONTICS, CORRECTIVE
Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104
Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887
OSSEOINTEGRATION
Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945
Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402

Index

Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE, et al. 976
Treatment of advanced periodontal destruction with immediately loaded implants and simultaneous bone augmentation: a case report. Romanos GE. 255
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338

OSTEOBLASTS
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982
Platelet-rich plasma contains high levels of platelet-derived growth factor and transforming growth factor-β and modulates the proliferation of periodontally related cells in vitro. Okuda K, et al. 849
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858

OSTEOCLASTS
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348
Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440

OSTEOGENESIS
Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483
Changes in alveolar bone height and width following post-extraction ridge augmentation using a fixed bioabsorbable membrane and demineralized freeze-dried bone osteoinductive graft. Zubillaga G, et al. 965
Effect of recombinant human bone morphogenetic protein-2 in dehiscence defects with non-submerged immediate implants: an experimental study in Cynomolgus monkeys. Hanisch O, et al. 648
Effects of low-dose cyclosporin on osteogenesis of human demineralized bone grafts in a surgically created mandibular defect in rats. Fu E, et al. 1136
Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865
Mandibular bone remodeling under a choline-deficient diet: a histomorphometric study in rats. Gorustovich AA, et al. 831
Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al.1143

OSTEOPENIA
Consideration of systemic hormone status when treating patients with osteopenia (Guest editorial). Boyan BD, et al. 1692
Mandibular bone remodeling under a choline-deficient diet: a histomorphometric study in rats. Gorustovich AA, et al. 831

OSTEOPOROSIS/etiology
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomized rats. Duarte PM, et al. 1618

OSTEOTOMY, SEGMENTAL
The segmental osteotomy in the management of malposed implants. A case report and literature review. Kassolis JD, et al. 529

OUTCOME ASSESSMENT
Clinical outcome observed in subjects with recurrent periodontal disease following local treatment with 25% metronidazole gel. Jansson H, et al. 372
Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt A, et al. 1415

OVARIECTOMY
Effect of estrogen and calcitonin therapies on bone density in a lateral area adjacent to implants placed in the tibiae of ovariectomized rats. Duarte PM, et al. 1618

OXALATES/therapeutic use
In vivo sensitivity of human root dentin to air blast and scratching. Camps J, et al. 1589

OXYGEN SATURATION LEVEL
A preliminary study on oxygen saturation levels of patients during periodontal surgery with and without oral conscious sedation using diazepam. Aeschliman SD, et al. 1056

P

PAIN/measurement
Pain experienced by patients during periodontal maintenance. Chung DT, et al. 1293

PAIN/prevention and control
Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597
Pain experienced by patients during periodontal maintenance. Chung DT, et al. 1293

PAIN THRESHOLD
Pain experienced by patients during periodontal maintenance. Chung DT, et al. 1293

PATIENT CARE PLANNING
Altered healing following mucogingival surgery in a patient with Crohn's disease: a literature review and case report. Andersen K-M, et al. 537
Augmentation of the posterior maxilla: a proposed hierarchy of treatment selection. Fugazzotto PA. 1682

PEPTIDES, CELL-BINDING
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458

Index

PERI-IMPLANT
Dimensions of peri-implant mucosa: an evaluation of maxillary anterior single implants in humans. Kan JYK, et al. 557
Mandibular fracture caused by peri-implant bone loss: report of a case. Meijer HJA, et al. 1067
PERI-IMPLANT DISEASES/diagnosis
Peripheral giant cell granuloma associated with dental implants. Hirshberg A, et al. 1381
PERI-IMPLANT DISEASES/drug therapy
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt Å, et al. 1415
PERI-IMPLANT DISEASES/microbiology
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt Å, et al. 1415
PERI-IMPLANT DISEASES/pathogenesis
Transforming growth factor-beta 1 expression in the peri-implant soft tissues of healthy and failing dental implants. Cornelini R, et al. 446
PERI-IMPLANT DISEASES/prevention and control
Clinical and radiographic evaluation of soft and hard tissue changes around implants: a pilot study. Joly JC, et al. 1097
PERI-IMPLANT DISEASES/surgery
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt Å, et al. 1415
PERI-IMPLANT DISEASES/therapy
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338
PERIODONTAL ATTACHMENT
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104
Partial-mouth assessment of periodontal disease in an adult population of the United States. Owens JD, et al. 1206
Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635
Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590
PERIODONTAL ATTACHMENT LOSS
Clinical and microbiologic study of periodontitis associated with Kindler syndrome. Wiebe CB, et al. 25
β-Glucuronidase activity in saliva: relationship to clinical periodontal parameters. Lamster I, et al. 353
Reliability of clinical attachment level recordings: effects on prevalence, extent, and severity estimates. López R, et al. 512
Untreated periodontal disease: a follow-up on 30 cases. Harris RJ. 672
PERIODONTAL ATTACHMENT LOSS/drug therapy
Meta-analysis of local tetracycline in treating chronic periodontitis. Pavia M, et al. 916
PERIODONTAL ATTACHMENT LOSS/etiology
The influence of gingival margin recession on loss of clinical attachment in alcohol-dependent patients without medical disorders. Khocht A, et al. 485
PERIODONTAL CYST
Ameloblastoma of the mandible: a case report. Levin MP, et al. 883
PERIODONTAL DISEASES
Oral features of mucocutaneous disorders. Position paper. 1545
Periodontal diseases of children and adolescents. Position paper. 1696
Untreated periodontal disease: a follow-up on 30 cases. Harris RJ. 672
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
PERIODONTAL DISEASES/adverse effects
The relationship between volatile sulfur compounds and major halitosis-inducing factors. Lee C-H, et al. 32
PERIODONTAL DISEASES/complications
Alveolar bone response in an experimental model of renal failure and periodontal disease: a histomorphometric and histochemical study. Mandalunis PM, et al. 1803
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007
PERIODONTAL DISEASES/diagnosis
Are cytokines linked to collagen breakdown during periodontal disease progression? Ejeil A-L, et al. 196
Diagnosis of periodontal diseases. Position paper. American Academy of Periodontology. 1237
Partial-mouth assessment of periodontal disease in an adult population of the United States. Owens JD, et al. 1206
Periodontal maintenance. Position paper. American Academy of Periodontology. 1395
PERIODONTAL DISEASES/drug therapy
Clinical outcome observed in subjects with recurrent periodontal disease following local treatment with 25% metronidazole gel. Jansson H, et al. 372
Effect of non-surgical periodontal therapy on glycemic control in patients with type 2 diabetes mellitus. Rodrigues DC, et al. 1361
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348
PERIODONTAL DISEASES/epidemiology
Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181

Index

Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610
Obesity and perodontal disease in youth, middle-aged, and older adults. Al-Zahrani MS, et al. 610
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336
PERIODONTAL DISEASES/etiology
Association of increased levels of fibrinogen and the –455G/A fibrinogen gene polymorphism with chronic periodontosis. Sahingur SE, et al. 329
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391
Periodontal disease and diabetes mellitus: the role of tumor necrosis factor- in a 2-way relationship. Nishimura F, et al. 97
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822
PERIODONTAL DISEASES/instrumentation
Scanning electron microscope evaluation of two methods of resharpening periodontal curets: a comparative study. Moses O, et al. 1032
PERIODONTAL DISEASES/microbiology
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
Detection of *Tannerella forsythensis (Bacteroides forsythus)* and *Porphyromonas gingivalis* by polymerase chain reaction in subjects with different periodontal status. Klein MI, et al. 798
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
High prevalence of *Helicobacter pylori* detected by PCR in the oral cavities of periodontitis patients. Umeda M, et al. 129
Modulation of *Porphyromonas gingivalis* proteinase activity by suboptimal doses of antimicrobial agents. Grenier D, et al. 1316
PERIODONTAL DISEASES/pathogenesis
Associations between systemic status, periodontal status, serum cytokine levels, and delivery outcomes in pregnant women with a diagnosis of threatened premature labor. Hasegawa K, et al. 1764
Characterization of biologically active cell surface components of a periodontal pathogen. The roles of major and minor fimbriae of *Prophyromonas gingivalis*. Umemoto T, et al. 119
Clinical and microbiologic study of periodontitis associated with Kindler syndrome. Wiebe CB, et al. 25
Perspective of cytokine regulation for periodontal treatment: fibroblast biology. Takashiba S, et al. 102
Transforming growth factor-beta 1 expression in the periimplant soft tissues of healthy and failing dental implants. Cornelini R, et al. 446
PERIODONTAL DISEASES/prevention and control
Effect of loading on the vibration characteristics of thin magnetostrictive ultrasonic scaler inserts. Trenter SC, et al. 1308
Periodontal maintenance. Position paper. American Academy of Periodontology. 1395
PERIODONTAL DISEASES/surgery
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Effects of enamel matrix derivative on *Porphyromonas gingivalis*. Newman SA, et al. 1191
PERIODONTAL DISEASES/therapy
Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
Coordination meeting, 2002. 1080
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
The effect of enamel matrix proteins on periodontal regeneration as determined by histological analyses. Cochran DL, et al. 1043
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
Effect of non-surgical periodontal therapy on glycemic control in patients with type 2 diabetes mellitus. Rodrigues DC, et al. 1361
Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175
Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of an enamel matrix protein derivative. Sculean A, et al. 153
Mouthrinses with alcohol; cytotoxic effects on human gingival fibroblasts in vitro. Poggi P, et al. 623
Pain experienced by patients during periodontal maintenance. Chung DT, et al. 1293
Periodontal maintenance. Position paper. American Academy of Periodontology. 1395
Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590
Treatment of plaque-induced gingivitis, chronic periodontitis, and other cliniical conditions (Position paper). 1568 Clarification of J. Perio. 2001:72:1790
PERIODONTAL DISEASES/trends
Periodontal referral patterns, 1980 versus 2000: a preliminary study. Cobb CM, et al. 1470
PERIODONTAL INDEX
Blood test values and Community Periodontal Index scores in medical checkup recipients. Takami Y, et al. 1778
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51
Partial-mouth assessment of periodontal disease in an adult population of the United States. Owens JD, et al. 1206
Periodontal disease in HIV-positive individuals: association of periodontal indices with stages of HIV disease. Vastardis SA, et al. 1336

Index

Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590

PERIODONTAL LIGAMENT

Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652

PERIODONTAL LIGAMENT/anatomy and histology

Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982

In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451

Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76

Platelet-rich plasma contains high levels of platelet-derived growth factor and transforming growth factor-β and modulates the proliferation of periodontally related cells in vitro. Okuda K, et al. 849

Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858

PERIODONTAL LIGAMENT/pathology

Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603

PERIODONTAL LIGAMENT ATTACHMENT

The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458

PERIODONTAL LIGAMENT ATTACHMENT LOSS

Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521

PERIODONTAL POCKETS

Adhesion of *Porphyromonas gingivalis* serotypes to pocket epithelium. Dierickx K, et al. 644

Effects of 2.94 μmer:YAG laser radiation on root surfaces treated *in situ*: a histological study. Folwaczny M, et al. 360

Partial-mouth assessment of periodontal disease in an adult population of the United States. Owens JD, et al. 1206

PERIODONTAL POCKETS/diagnosis

Reproducibility of probing depth measurements using a constant-force electronic probe: analysis of inter- and intraexaminer variability. Araujo MWB, et al. 1736

PERIODONTAL POCKETS/prevention and control

Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060

PERIODONTAL POCKETS/surgery

Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597

PERIODONTAL POCKETS/therapy

The effect of enamel matrix proteins on periodontal regeneration as determined by histological analyses. Cochran DL, et al. 1043

Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104

PERIODONTAL PROBES

Meta-analysis of local tetracycline in treating chronic periodontitis. Pavia M, et al. 916

Reproducibility of probing depth measurements using a constant-force electronic probe: analysis of inter- and intraexaminer variability. Araujo MWB, et al. 1736

PERIODONTAL REGENERATION

Comparative clinical study of connective tissue graft and two types of bioabsorbable barriers in the treatment of localized gingival recessions. Çetiner D, et al. 1196

The effect of enamel matrix proteins on periodontal regeneration as determined by histological analyses. Cochran DL, et al. 1043

Efficacy of controlled-release subgingival chlorhexidine to enhance periodontal regeneration. Reddy MS, et al. 411

Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110

Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126

Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808

Gene therapy of bone morphogenetic protein for periodontal tissue engineering. Jin Q-M, et al. 202

In vitro evaluation of the mitogenic effect of platelet-derived growth factor-BB on human periodontal ligament cells cultured with various bone allografts. Papadopoulos CE, et al. 451

Long-term results of guided tissue regeneration therapy in the treatment of Class II furcation defects: a randomized clinical trial. Cury PR, et al. 3

Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76

Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780

Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282

Periodontal regeneration with a combination of enamel matrix proteins and autogenous bone grafts. Cochran DL, et al. 1269

Platelet-derived growth factor-BB stimulated cell migration mediated through p38 signal transduction pathway in periodontal cells. Ray AK, et al. 1320

Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420

The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458

PERIODONTITIS

Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219

Expression of vascular endothelial growth factor in human periodontal tissues: comparison of healthy and diabetic patients. Ünlü F, et al. 181

Index

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature-induced periodontitis in the rat. Achong R, et al. 494

Risk of periodontitis in systemic lupus erythematosus is associated with Fc receptor polymorphisms. Kobayashi T, et al. 378

PERIODONTITIS/complications

Periodontal disease and preterm birth: results of a pilot intervention study. Jeffcoat MK, et al. 1214

PERIODONTITIS/diagnosis

Species-specific DNA probe for the detection of *Porphyromonas gingivalis* from adult Chinese periodontal patients and healthy subjects. Liu L, et al. 1000

PERIODONTITIS/drug therapy

Meta-analysis of local tetracycline in treating chronic periodontitis. Pavia M, et al. 916

PERIODONTITIS/epidemiology

Lifestyle and psychosocial factors associated with chronic periodontitis in Taiwanese adults. Teng H-C, et al. 1169

PERIODONTITIS/etiology

The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391

The influence of gingival margin recession on loss of clinical attachment in alcohol-dependent patients without medical disorders. Khocht A, et al. 485

Relationship between transmission of *Porphyromonas gingivalis* and *FimA* type in spouses. Asano H, et al. 1355

PERIODONTITIS/microbiology

Antibody responses of periodontitis patients to gingipains of *Porphyromonas gingivalis*. Inagaki S, et al. 1432

Association of periodontal status with general health conditions and serum antibody titers for *Porphyromonas gingivalis* and *Actinobacillus actinomycetemcomitans*. Furuichi Y, et al. 1491

Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*. Tong KSK, et al. 1582

Human monoclonal antibody inhibits *Porphyromonas gingivalis* hemagglutinin activity. Kaizuka K, et al. 38

Interactions of *Porphyromonas gingivalis* with host cells: implications for cardiovascular diseases. Kuramitsu HK, et al. 85

Molecular interaction of *Porphyromonas gingivalis* with host cells: implication for the microbial pathogenesis of periodontal disease. Amano A. 90

The role of gingipains in the pathogenesis of periodontal disease. Imamura T. 111

Species-specific DNA probe for the detection of *Porphyromonas gingivalis* from adult Chinese periodontal patients and healthy subjects. Liu L, et al. 1000

Subgingival microflora in Turkish patients with periodontitis. Dogan B, et al. 803

PERIODONTITIS/pathogenesis

Subgingival microflora in Turkish patients with periodontitis. Dogan B, et al. 803

PERIODONTITIS/physiopathology

Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719

PERIODONTITIS/physiology

Quantification and localization of platelet-derived growth factor in gingiva of periodontitis patients. Pinheiro MLB, et al. 323

PERIODONTITIS/prevention and control

Inhibitory effects of incadronate on the progression of rat experimental periodontitis by *Porphyromonas gingivalis* infection. Tani-Ishii N, et al. 603

PERIODONTITIS/therapy

Clinical responses to mechanical periodontal treatment in Chinese chronic periodontitis patients with and without *Actinobacillus actinomycetemcomitans*. Tong KSK, et al. 1582

Effects of selective cyclooxygenase-2 inhibition on gingival tissue levels of prostaglandin E_2 and prostaglandin $F_{2\alpha}$ and clinical parameters of chronic periodontitis. Vardar S, et al. 57

Glucuronidase activity in saliva: relationship to clinical periodontal parameters. Lamster I, et al. 353

Human monoclonal antibody inhibits *Porphyromnas gingivalis* hemagglutinin activity. Kaizuka K, et al. 38

Impact of increased occlusal contact, interleukin-1 genotype, and periodontal severity on gingival crevicular fluid IL-1β levels. McDevitt MJ, et al. 1302

The role of gingipains in the pathogenesis of periodontal disease. Imamura T. 111

Treatment of plaque-induced gingivitis, chronic periodontitis, and other cliniical conditions. Position paper. 1568 Clarification of J. Perio. 2001:72:1790

PERIODONTITIS, AGGRESSIVE

Cyclooxygenase-2 inhibitors decrease interleukin-1β-stimulated prostaglandin E_2 and IL-6 production by human gingival fibroblasts. Tipton DA, et al. 1754

Distribution of interleukin-$1\beta^{+3954}$ and IL-$1\alpha^{-889}$ genetic variations in a Thai population group. Anusaksathien O, et al. 1796

Mutations of F110 and C126 of the formyl peptide receptor interfere with G-protein coupling and chemotaxis. Jones BE, et al. 475

PERIODONTITIS, AGGRESSIVE/microbiology

Distribution of periodontal pathogens in Korean aggressive periodontitis. Lee J-W, et al. 1329

Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460

Subgingival microflora in Turkish patients with periodontitis. Doğan B, et al. 803

PERIODONTITIS, AGGRESSIVE/pathogenesis

Distribution of periodontal pathogens in Korean aggressive periodontitis. Lee J-W, et al. 1329

Neutrophil-mediated tissue injury in periodontal disease pathogenesis: findings from localized aggressive periodontitis. Kantarci A, et al. 66

Prevalence of human herpesviruses in patients with aggressive periodontitis. Yapar M, et al. 1634

Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460

Index

Prostaglandin E_2-mediated regulation of immunoglobulin G2 via interferon gamma. Tanaka S, et al. 771
Subgingival microflora in Turkish patients with periodontitis. Doğan B, et al. 803
PERIODONTITIS, AGGRESSIVE/prevention and control
Localized aggressive periodontitis in primary dentition: a case report. Suzuki J, et al. 1060
PERIODONTITIS, AGGRESSIVE/surgery
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
PERIODONTITIS, AGGRESSIVE/therapy
Bioabsorbable membrane and bioactive glass in the treatment of intrabony defects in patients with generalized aggressive periodontitis: results of a 12-month clinical and radiological study. Mengel R, et al. 899
PERIODONTITIS, CHRONIC
Distribution of interleukin-$1\beta^{+3954}$ and IL-$1\alpha^{-889}$ genetic variations in a Thai population group. Anusaksathien O, et al. 1796
PERIODONTIUM
Periodontal health, salivary status, and metabolic control in children with type 1 diabetes mellitus. Aren, G, et al. 1789
PERIODONTIUM/anatomy and histology
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
Surgical crown lengthening: evaluation of the biological width. Lanning SK, et al. 468
PERIODONTOLOGY
Modern periodontology-new directions in the 21st century. Genco RJ. 64
PEROXIDASES
Periodontal health, salivary status, and metabolic control in children with type 1 diabetes mellitus. Aren, G, et al. 1789
PHOTOCHEMOTHERAPY
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338
PHOTOSENSITIZING AGENTS
Treatment of ligature-induced peri-implantitis by lethal photosensitization and guided bone regeneration: a preliminary histologic study in dogs. Shibli JA, et al. 338
PLANING
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of an enamel matrix protein derivative. Sculean A, et al. 153
Intrapocket anesthesia for scaling and root planing in pain-sensitive patients. Magnusson I, et al. 597
Periodontal treatment with an Er:YAG laser or scaling and root planing. A 2-year follow-up split-mouth study. Schwarz F, et al. 590
Probing depth changes following 2 years of periodontal maintenance therapy including adjunctive controlled release of chlorhexidine. Soskolne WA, et al. 420
Treatment of plaque-induced gingivitis, chronic periodontitis, and other cliniical conditions (Position paper). 1568 Clarification of J. Perio. 2001:72:1790
PLASMA, PLATELET-RICH
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
Platelet-rich plasma contains high levels of platelet-derived growth factor and transforming growth factor-β and modulates the proliferation of periodontally related cells in vitro. Okuda K, et al. 849
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
PLASMINOGEN DEFICIENCY
Recurrent recalcitrant gingival hyperplasia and plasminogen deficiency: a case report. Suresh L, et al. 1508
L-POLYLACTIDE
Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865
POLYMERASE CHAIN REACTION
Detection of *Tannerella forsythensis (Bacteroides forsythus)* and *Porphyromonas gingivalis* by polymerase chain reaction in subjects with different periodontal status. Klein MI, et al. 798
Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460
POLYMORPHISM
Association between interleukin-1 genotype and periodontal disease in a diabetic population. Guzman S, et al. 1183
POLYMORPHISM, GENETIC
Association of increased levels of fibrinogen and the –455G/A fibrinogen gene polymorphism with chronic periodontosis. Sahingur SE, et al. 329
Distribution of interleukin-$1\beta^{+3954}$ and IL-$1\alpha^{-889}$ genetic variations in a Thai population group. Anusaksathien O, et al. 1796
Risk of periodontitis in systemic lupus erythematosus is associated with Fcγ receptor polymorphisms. Kobayashi T, et al. 378
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
POLYTETRAFLUOROETHYLENE/therapeutic use
Attachment of periodontal ligament cells to chlorhexidine-loaded guided tissue regeneration membranes. Chen Y-T, et al. 1652
Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161
Factors influencing the outcome of regenerative therapy in mandibular Class II furcations: Part I. Bowers GM, et al. 1255
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168

cumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808
Gene therapy of bone morphogenetic protein for periodontal tissue engineering. Jin Q-M, et al. 202
Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982
PROTEINS, C-REACTIVE
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
Association between alveolar bone loss and elevated serum C-reactive protein in Japanese men. Saito T, et al. 1741
Relationship of destructive periodontal disease to acute phase reaction. Craig RG, et al. 1007
PROTEINS, ENAMEL MATRIX
The effect of enamel matrix proteins on periodontal regeneration as determined by histological analyses. Cochran DL, et al. 1043
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
PROTEINS, ENAMEL MATRIX/therapeutic use
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
PROTEINS, HEAT SHOCK
Effects of transforming growth factor-β1, interleukin-1, and interferon-γ on the expression of type I collagen, heat shock protein 47, matrix metalloproteinase (MMP)-1 and MMP-2 by fibroblasts from normal gingiva and hereditary gingival fibromatosis. Martelli-Junior H, et al. 296
PROTEINS, RECOMBINANT
Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787
Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808
Human periodontal ligament cell responses to recombinant human bone morphogenetic protein-2 with and without bone allografts. Markopoulou CE, et al. 982
PROTEOGLYCANS
Gene expression of extracellular matrix proteoglycans in human cyclosporin-induced gingival overgrowth. Gnoatto N, et al. 1747

R

RECEPTORS, FcγR
Constitutionally hyperreactive neutrophils in periodontitis. Fredriksson MI, et al. 219
RECEPTORS, FORMYL PEPTIDE
Mutations of F110 and C126 of the formyl peptide receptor interfere with G-protein coupling and chemotaxis. Jones BE, et al. 475
RECEPTORS, GROWTH FACTOR, FIBROBLAST
Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780
RECEPTORS, GROWTH FACTOR, TRANSFORMING
Novel isolation of alkaline phosphatase-positive subpopulation from periodontal ligament fibroblasts. Murakami Y, et al. 780
RECEPTORS, IgG
Risk of periodontitis in systemic lupus erythematosus is associated with Fcγ receptor polymorphisms. Kobayashi T, et al. 378
RECEPTORS, VITAMIN D
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
REFERRAL AND CONSULTATION
A referral-based periodontal practice – yesterday, today and tomorrow. McGuire, MK, et al. 1542
Periodontal referral patterns, 1980 versus 2000: a preliminary study. Cobb CM, et al. 1470
RENAL TRANSPLANTATION
Cyclosporin A-induced gingival overgrowth in renal transplant patients. Afonso M, et al. 51
REPRODUCIBILITY OF RESULTS
Reliability of clinical attachment level recordings: effects on prevalence, extent, and severity estimates. López R, et al. 512
Reproducibility of probing depth measurements using a constant-force electronic probe: analysis of inter- and intraexaminer variability. Araujo MWB, et al. 1736
REVIEW LITERATURE
Altered healing following mucogingival surgery in a patient with Crohn's disease: a literature review and case report. Andersen K-M, et al. 537
Augmentation of the posterior maxilla: a proposed hierarchy of treatment selection. Fugazzotto PA. 1682
Evidence-base mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Lichen planus and vulvovaginal syndrome. Ramer MA, et al. 1385
Oral Kaposi sarcoma associated with severe alveolar bone loss: case report and review of the literature. Lausten LL, et al. 1668

Subgingival microflora in Turkish patients with periodontitis. Doğan B, et al. 803
SIALOGLYCOPROTEINS, BONE
Amelogenin: a potential regulator of cementum-associated genes. Viswanathan HL, et al. 1423
SIGNAL PATHWAYS
Role of insulin-like growth factor-1 signaling in dental fibroblast apoptosis. Han X, et al. 1176
SIGNAL TRANSDUCTION
Molecular interaction of *Porphyromonas gingivalis* with host cells: implication for the microbial pathogenesis of periodontal disease. Amano A. 90
Neutrophil-mediated tissue injury in periodontal disease pathogenesis: findings from localized aggressive periodontitis. Kantarci A, et al. 66
Platelet-derived growth factor-BB stimulated cell migration mediated through p38 signal transduction pathway in periodontal cells. Ray AK, et al. 1320
SINUS LIFT
Radiologic and histomorphometric evaluation of maxillary sinus grafting with alloplastic graft materials. Ozyuvaci H, et al. 909
SJÖGREN'S SYNDROME
Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Çelenligil H, et al. 247
SKIN
Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242
SMEAR LAYER
Permeability and morphology of dentin after erosion induced by acidic drinks. Prati C, et al. 428
SMOKING/adverse effects
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
Factors associated with periodontal diseases in a dental teaching clinic population in Northern Jordan. Khader YS, et al. 1610
Five-year clinical, microbiological, and radiological outcome following treatment of peri-implantitis in man. Leonhardt Å, et al. 1415
Guided tissue regeneration in smokers: effect of aggressive anti-infective therapy in Class II furcation defects. Machtei EE, et al. 579
Nicotine stimulates osteoclast resorption in a porcine marrow cell model. Henemyre CL, et al. 1440
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822

SOFT TISSUE/anatomy and histology
Vertical distance from the crest of bone to the height of the interproximal papilla between adjacent implants. Tarnow D, et al. 1785
SOFT TISSUE/complications
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
SOFT TISSUE/surgery
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
SOFT TISSUE, PERI-IMPLANT
Peri-implant soft tissue integration of immediately loaded implants in the posterior macaque mandible: a histomorphometric study. Siar CH, et al. 571
SOFT TISSUE INDEX
Peri-implant soft tissue integration of immediately loaded implants in the posterior macaque mandible: a histomorphometric study. Siar CH, et al. 571
SPLINTS, OCCLUSAL
Impact of increased occlusal contact, interleukin-1 genotype, and periodontal severity on gingival crevicular fluid IL-1β levels. McDevitt MJ, et al. 1302
SPLIT-CREST PROCEDURE
The segmental ridge-split procedure. Coatoam GW, et al. 757
SPOUSES
Relationship between transmission of *Porphyromonas gingivalis* and *FimA* type in spouses. Asano H, et al. 1355
STOMACH DISEASES/microbiology
Ecological and immunopathological implications of oral bacteria in *Helicobacter pylori*-infected disease. Okuda K, et al. 123
STRESS/prevention and control
A preliminary study on oxygen saturation levels of patients during periodontal surgery with and without oral conscious sedation using diazepam. Aeschliman SD, et al. 1056
SUBSTANCE ABUSE
The influence of gingival margin recession on loss of clinical attachment in alcohol-dependent patients without medical disorders. Khocht A, et al. 485
SULFUR COMPOUNDS
The relationship between volatile sulfur compounds and major halitosis-inducing factors. Lee C-H, et al. 32
A salivary incubation test for evaluation of oral malodor: a pilot study. Quirynen M, et al. 937
SURGICAL FLAPS
Enamel matrix proteins and bovine porous bone mineral in the treatment of intrabony defects: a comparative controlled clinical trial. Zucchelli G, et al. 1725
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 1: Comparison of clinical parameters. McGuire MK, et al. 1110
Evaluation of human recession defects treated with coronally advanced flaps and either enamel matrix derivative or connective tissue. Part 2: Histological evaluation. McGuire MK, et al. 1126
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiosteal flap surgery in the rat mandible. Kaynak D, et al. 1348
Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521
Root coverage: comparison of coronally positioned flap with and without titanium-reinforced barrier membrane. Lin LHS, et al. 168
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
Surgical crown lengthening: evaluation of the biological width. Lanning SK, et al. 468
SYSTEMIC LUPUS ERYTHEMATOSUS
Risk of periodontitis in systemic lupus erythematosus is associated with Fcg receptor polymorphisms. Kobayashi T, et al. 378

T

TACROLIMUS/therapeutic use
Conversion from cyclosporin A to tacrolimus as a nonsurgical alternative to reduce gingival enlargement: a preliminary case series. Hernández G, et al. 1816
An unusual oral chronic graft-versus-host disease-like syndrome following a liver transplant. Bunetal L, et al. 552
TAIWANESE
Lifestyle and psychosocial factors associated with chronic periodontitis in Taiwanese adults. Teng H-C, et al. 1169
TANNERELLA FORSYTHENSIS
Detection of *Tannerella forsythensis (Bacteroides forsythus)* and *Porphyromonas gingivalis* by polymerase chain reaction in subjects with different periodontal status. Klein MI, et al. 798
Prevalence of periodontopathic bacteria in aggressive periodontitis patients in a Japanese population. Takeuchi Y, et al. 1460
TARTRATES
Alveolar bone response in an experimental model of renal failure and periodontal disease: a histomorphometric and histochemical study. Mandalunis PM, et al. 1803
TEMPERATURE
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
TETRACYCLINE/adverse effects
Minocycline-induced staining of torus palatinus and alveolar bone. Ayangco L, et al. 669
TETRACYCLINE/therapeutic use
Combined local application of tetracycline and bisphosphonate reduces alveolar cone resorption in rats. Yaffe A, et al. 1038
Meta-analysis of local tetracycline in treating chronic periodontitis. Pavia M, et al. 916
Modulation of *Porphyromonas gingivalis* proteinase activity by suboptimal doses of antimicrobial agents. Grenier D, et al. 1316

THAI PEOPLE
Distribution of interleukin-1β^{+3954} and IL-1α^{-889} genetic variations in a Thai population group. Anusaksathien O, et al. 1796
THROMBIN
Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498
Platelet-rich plasma-derived fibrin clot formation stimulates collagen synthesis in periodontal ligament and osteoblastic cells in vitro. Kawase T, et al. 858
TIMP-1
The effects of cyclosporin on the collagenolytic activity of gingival fibroblasts. Hyland PL, et al. 437
TISSUE ENGINEERING
An autologous cell hyaluronic acid graft technique for gingival augmentation: a case series. Pini Prato GP, et al. 262
TISSUE FACTORS
A histopathological investigation on the effect of systemic administration of the bisphosphonate alendronate on resorption phase following mucoperiodsteal flap surgery in the rat mandible. Kaynak D, et al. 1348
TITANIUM
Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945
Bone-implant interface around titanium implants under different loading conditions: a histomorphometrical analysis in the *Macaca fascicularis* monkey. Romanos GE, et al. 1483
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Early functional loading at 5 days for Branemark implants placed into edentulous mandibles: a prospective, open-ended, longitudinal study. Becker,W, et al. 695
Guided bone regeneration around titanium plasma-sprayed, acid-etched, and hydroxyapatite-coated implants in the canine model. Conner KA, et al. 658
Immediate functional and non-functional loading of dental implants: a 2- to 60-month follow-up study of 646 titanium implants. Degidi M, et al. 225
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402
Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976
Performance of double acid-etched surface external hex titanium implants in relation to one- and two-stage surgical procedures. Ibañez JC, et al. 1575
TOBACCO/adverse effects
A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454
Effect of tobacco smoking on neutrophil activity following periodontal surgery. Persson L, et al. 1475
Quantitative evaluation of the vasculature and fibronectin localization in gingival connective tissue of smokers and non-smokers. Sönmez S, et al. 822
TONGUE DISEASES/adverse effects
The relationship between volatile sulfur compounds and major halitosis-inducing factors. Lee C-H, et al. 32
TOOTH CROWN
Crown lengthening in mandibular molars: a 5-year retrospective radiographic analysis. Dibart S, et al. 815
TOOTH DISCOLORATION
Minocycline-induced staining of torus palatinus and alveolar bone. Ayangco L, et al. 669
TOOTH ERUPTION
Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887
TOOTH EXTRACTION
Bucco-lingual bone remodeling around implants placed into immediate extraction sockets: a case series. Covani U, et al. 268
Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887
TOOTH EXTRACTION/adverse effects
Ridge preservation with freeze-dried bone allograft and a collagen membrane compared to extraction alone for implant site development: a clinical and histologic study in humans. Iasella JM, et al. 990
TOOTH EXTRACTION/therapy
Immediate implants covered with connective tissue membranes: human biopsies. Wilson, TG, Jr., et al. 402
TOOTH, IMPACTED
Use of orthodontic treatment as an aid to third molar extraction: a method for prevention of mandibular nerve injury and improved periodontal status. Hirsch A, et al. 887
TOOTH LOSS
Vitamin D receptor alleles, periodontal disease progression, and tooth loss in the VA Dental Longitudinal Study. Inagaki K, et al. 161
TOOTH LOSS/etiology
Untreated periodontal disease: a follow-up on 30 cases. Harris RJ. 672
TOOTH MOBILITY
Impact of increased occlusal contact, interleukin-1 genotype, and periodontal severity on gingival crevicular fluid IL-1β levels. McDevitt MJ, et al. 1302
Untreated periodontal disease: a follow-up on 30 cases. Harris RJ. 672
TOOTH MOBILITY/prevention and control
Orthodontic movement into infrabony defects in patients with advanced periodontal disease: a clinical and radiological study. Corrente G, et al. 1104
TOOTH ROOT
Adhesion and growth of cultured human gingival fibroblasts on periodontally involved root surfaces treated by Er:YAG laser. Feist IS, et al. 1368
Effect of Er:YAG and diode laser irradiation on the root surface: morphological and thermal analysis. Theodoro LH, et al. 838
Effects of 2.94 μmer:YAG laser radiation on root surfaces treated *in situ*: a histological study. Folwaczny M, et al. 360

Gingival/soft tissue abscess following subepithelial connective tissue graft to root coverage: report of three cases/ Vastardis S, et al. 1676
Guided tissue regeneration-based root coverage: meta-analysis. Al-Hamdan K, et al. 1520
In vivo sensitivity of human root dentin to air blast and scratching. Camps J, et al. 1589
The putative collagen-binding peptide P-15 promotes fibroblast attachment to root shavings but not hydroxyapatite. Lallier TE, et al. 458
TOOTH ROOT/surgery
Evidence-based mucogingival therapy. Part 1: A critical review of the literature on root coverage procedures. Pagliaro U, et al. 709
Evidence-based mucogingival surgery. Part 2: Ordinary and individual patient data meta-analyses of surgical treatment of recession using complete root coverage as the outcome variable. Clauser C, et al. 741
A gingival cul-de-sac following a root coverage procedure with a subepithelial connective tissue submerged graft. Wei P-C, et al. 1376
Root coverage in molar recession: report of 50 consecutive cases treated with subepithelial connective tissue grafts. Harris RJ. 703
The subepithelial connective tissue graft with a vestibular releasing incision. Butler BL. 893
TOOTH, SUPERNUMERARY
A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225
TOOTHBRUSHING
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312
In vitro assessment of the plaque-removing ability of hydrodynamic shear forces produced beyond the bristles by 2 electric toothbrushes. Hope CK, et al. 1017
Optimum force and duration of toothbrushing to enhance gingival fibroblast proliferation and procollagen Type I synthesis in dogs. Tomofuji T, et al. 630
Permeability and morphology of dentin after erosion induced by acidic drinks. Prati C, et al. 428
Spatial extent of gingival cell activation due to mechanical stimulation by toothbrushing. Sakamoto T, et al. 585
TOOTHPASTE
Can toothpaste or a toothbrush with antibacterial tufts prevent toothbrush contamination? Quirynen M, et al. 312
TORUS PALATINUS
Minocycline-induced staining of torus palatinus and alveolar bone. Ayangco L, et al. 669
TRABECULAE/radiography
Digital image analysis of cadaver mandibular trabecular bone patterns. Shrout MK, et al. 1342
TRICALCIUM PHOSPHATE
Effect of recombinant human bone morphogenetic protein-4 with carriers in rat calvarial defects. Ahn S-H, et al. 787
Enhanced bone augmentation by controlled release of recombinant human bone morphogenetic protein-2 from bioabsorbable membranes. Lee Y-M, et al. 865
TUMOR NECROSIS FACTOR
Antimicrobial periodontal treatment decreases serum C-reactive protein, tumor necrosis factor-alpha, but not adiponectin levels in patients with chronic periodontitis. Iwamoto Y, et al. 1231
The contribution of interleukin-1 and tumor necrosis factor to periodontal tissue destruction. Graves DT, et al. 391
Effect of *Porphyromonas gingivalis* lipopolysaccharide, tumor necrosis factor-α and interleukin-1β on calprotectin release in human monocytes. Suryono, et al. 1719
Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76
Periodontal disease and diabetes mellitus: the role of tumor necrosis factor- in a 2-way relationship. Nishimura F, et al. 97
TURKEY
Subgingival microflora in Turkish patients with periodontitis. Doğan B, et al. 803
TYROSINE KINASES
Neurotrophins in cultured cells from periodontal tissues. Kurihara H, et al. 76

U

ULTRASONICS/instrumentation
Effect of loading on the vibration characteristics of thin magnetostrictive ultrasonic scaler inserts. Trenter SC, et al. 1308
ULTRASONICS/therapeutic use
Effects of Nd:YAG and CO laser treatment and ultrasonic scaling on periodontal pockets of chronic periodontitis patients. Miyazaki A, et al. 175
Histologic evaluation of human intrabony defects following non-surgical periodontal therapy with and without application of an enamel matrix protein derivative. Sculean A, et al. 153
Treatment of plaque-induced gingivitis, chronic periodontitis, and other clinical conditions (Position paper). 1568 Clarification of J. Perio. 2001:72:1790
UNITED STATES FOOD AND DRUG ADMINISTRATION
FDA Report. 1569

V

VASCULAR CORROSION CAST
Microvascular response in the periodontal ligament following mucoperiosteal flap surgery. Nobuto T, et al. 521
VULVOVAGINAL SYNDROME
Lichen planus and vulvovaginal syndrome. Ramer MA, et al. 1385

W

WATER POLLUTION/prevention and control
Formation and decontamination of biofilms in dental unit waterlines. Wirthlin MR, et al. 1595
WOUND HEALING
Altered healing following mucogingival surgery in a patient with Crohn's disease: a literature review and case report. Andersen K-M, et al. 537

Index

Bone-implant contact on machined and dual acid-etched surfaces after 2 months of healing in the human maxilla. Trisi P, et al. 945

A comparative study on the effect of nicotine administration and cigarette smoke inhalation on bone healing around titanium implants. César-Neto JB, et al. 1454

Effects of enamel matrix derivative on *Porphyromonas gingivalis*. Newman SA, et al. 1191

Evaluation of a novel alloplast for osseous regeneration in the rat calvaria. Francis PO, et al. 1023

Favorable healing following space creation in rhBMP-2–induced periodontal regeneration of horizontal circumferential defects in dogs with experimental periodontitis. Saito E, et al. 1808

Healing is delayed in oral compared to dermal excisional wounds. Nooh N, et al. 242

In vivo effectiveness of a glycerol-compounded demineralized freeze-dried bone xenograft in the rat calvarium. Matzenbacher SA, et al. 1641

Influence of cyclosporin A therapy on bone healing around titanium implants: a histometric and biomechanic study in rabbits. Sakakura CE et al. 976

Membrane type (MT) 1-matrix metalloproteinase (MMP) and MMP-2 expression in ligature- induced periodontitis in the rat. Achong R, et al. 494

Optimum force and duration of toothbrushing to enhance gingival fibroblast proliferation and procollagen Type I synthesis in dogs. Tomofuji T, et al. 630

Periodontal regeneration in humans using recombinant human platelet-derived growth factor-BB (rhPDGF-BB) and allogenic bone. Nevins M, et al. 1282

Periodontal repair in dogs: evaluation of a bioabsorbable space-providing macro-porous membrane with recombinant human bone morphogenetic protein-2. Wikesjö UME, et al. 635

Platelet concentrates: effects of calcium and thrombin on endothelial cell proliferation and growth factor release. Lacoste E, et al. 1498

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 1: Description of a dog model and histological observations. Artzi Z, et al. 1143

Qualitative and quantitative expression of bovine bone mineral in experimental bone defects. Part 2: Morphometric analysis. Artzi Z, et al. 1153

X

XENOGRAFTS

Comparison of porous and non-porous teflon membranes plus a xenograft in the treatment of vertical osseous defects: a clinical reentry study. Walters SP, et al. 1161

XEROSTOMIA

Analysis of *in situ* proliferative activity in oral gingival epithelium in patients with xerostomia. Celenligil H, et al. 247

Z

ZIMMERMANN-LABAND SYNDROME

A case of Zimmermann-Laband syndrome with supernumerary teeth. Holzhausen M, et al. 1225
